Jelliff Corporation RoHS, REACH and WEEE Compliance Statement

Jelliff Corporation's intent is to offer products that allow you to be in compliance with the RoHS (Restriction of Hazardous Substances), REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) and WEEE (Waste, Electrical and Electronic Equipment) directives.

RoHS Compliant means that the product or part ("Product") does not contain any of the substances in excess of the maximum concentration values ("MCVs") defined in the EU RoHS Directive. The MCV are by weight in homogeneous materials. This information represents Jelliff Corporation's knowledge and belief, which may be based in whole or in part on information provided by third party suppliers to Jelliff Corporation.

RoHS Certificate of Compliance: After careful evaluation of EU Directives on Restriction of Hazardous Substances (RoHS), Jelliff Corporation hereby certifies that all product lines are fully compliant and conforms to the Directive dated 15 January 2018 on the restriction of the use of certain hazardous substances and electronic equipment. Additionally, these products do not contain any of the substances as described in Article 67 and Annex XVII (with amendments).

Certificate of REACH Compliance: Jelliff Corporation hereby certifies that our products do not contain any of the REACH Substances of Very High Concern (SVHC), as specified in the Candidate List published by ECHA (European Chemical Agency).

In the event any Product is proven not to conform with Jelliff Corporation's RoHS or REACH certification, then Jelliff Corporation's entire liability and Buyer's exclusive remedy, will be at Jelliff Corporation's option either: (i) replacement of Product with a conforming product, or (ii) refund of the purchase price paid by Buyer for each non-conforming Product, within a reasonable time after written notification of said non-conformance and return of said Product to Jelliff Corporation. Jelliff Corporation shall not under any circumstances be liable for direct, incidental, special, or consequential damages (including but not limited to loss of profits, revenue, or business) related to or arising out of this certification, including, the use, misuse or inability to use the Product. Unless stated otherwise in writing, the foregoing language cannot be waived, modified, or supplemented in any manner whatsoever.

Backwards Compatibility

Before using any Jelliff Corporation product in any processes, you must evaluate the product in your process and determine if it is suitable for your process. You assume all risks and liability associated with such use. It is NOT advisable to "drop in" RoHS compliant products to current processes without proper evaluation. It may be advisable to perform pilot runs with the RoHS compliant product to assure that the process achieves satisfactory results without process modification or adjustment. Some process adjustment may be necessary.

Jelliff Corporation Commitment to the Environment

You can expect Jelliff Corporation to continue producing products with superior quality and value. Jelliff Corporation is committed to providing safe products consistent with the improvement and protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. We anticipate this response satisfies your concerns regarding our products and requirements for RoHS, REACH and WEEE compliance information, if not, please contact us and we will do our best to provide additional information.
